

Day1 Assignments

Please Follow These Instructions

- 1- All HTML pages will be created using notepad.
- 2- Your code must be readable
- 3- use W3C standards (ex: all tags must be exists and closed well)
- 4- Don't you Ever Use CSS (style attributes)

Ass1:

Create web page as shown in image with the same contents and name it ass1.html

<Ps>

HTML paragraph tags are used to define the HTML paragraph element.

The paragraph element begins with the HTML <p> tag and ends with the HTML </p> tag.

The HTML paragraph element should not contain tables and other block elements. A sample is s

<Pres>

```
        This text is
in a fixed-pitch
        font, and it preserves
both    spaces and line breaks
```

<lists>

list can be either ordered or unordered list used symbols for display ,ordered use number

Unordered have symbols to choose from as following in this example,some lists nested within ot

- Circle (default)
